

SNOWSOUND®

Acoustic Technology & Design

ENVIRONMENTAL SERVICES
CITY OF PORTLAND

Project Name: City of Portland Bureau of Environmental Services
Location: Portland, OR

A&D Firm: Harris WorkSystems

Application: Office

Product: Flap Wings, Snowfix & Oversize

PROJECT TESTIMONIAL

We are very happy with end results. The product is outstanding and blends right into the design of the building. The installation went very well and was completed on schedule. There has been a huge improvement in the sound quality of these spaces in the Columbia Building. The echo, high frequencies, and overall decibel level the spaces have been reduced. The improvement is noticeable. Much needed in a building that is made of mainly concrete & glass.

Very glad we got this done as we installed our AV system. The audio quality of those spaces improved so much once the panels were up. We went from terrible echo on phone calls to being able to carry on a conversation at normal levels and be heard clearly on the other end. The Snowsound Panels helped us to get there.

I think that the lobby install turned out well. It helped that we already knew what it would look like because of the excellent design renderings executed by Snowsound.

Overall, I am very pleased with way the project turned out!

Robert Pyle, FMP
