SNOWSOUND-FIBER  
ACOUSTIC TEXTILE PROJECTS

“In today’s workplace, acoustic consideration is more important than ever. The Snowsound drapery allowed us to achieve the open collaborative zones while helping to mitigate noise concerns for the adjacent work areas.”

*~ Steven Burgos | Gensler Designer*

URBANCITYZEN

The inclusion of Snowsound's curtains in our LA showroom was a great choice. Not only do they look beautiful aesthetically and provide us with great versatility in how we use the space but ultimately their sound-absorbing performance is significant, providing us with a relaxing place to work with no echo even when the showroom is well populated.
