# SNOWSOUND® Acoustics & Well-Being Technologies SNOWSOUND ACOUSTIC SOFT SEATING

# **SNOWSOUND** Acoustic Soft Seating & Furniture

Snowsound introduces sofas, armchairs and ottomans with high acoustic performance capable of absorbing sound by reducing the reverberation of interiors, improving the quality of sound and therefore the well-being of the surrounding environment.

The skilful use of raw materials and Snowsound Fiber technologies guarantee exceptional acoustic performance, allowing designers to accomplish acoustic treatment in an innovative way.

The finishes for the acoustic soft seating align with the various Snowsound collections to coordinate the sofas with curtains, dividers, fabrics, lights or other sound-absorbing panels.

The premise behind Snowsound's launch into soft seating is to use acoustic technologies in a variety of furniture and accessories to optimize the acoustic treatment of interiors without limiting acoustic solutions to wall or ceiling panels as was traditionally conceived.

# **SNOWKING,** Acoustic Sofa Design (a+b) Dominoni, Quaquaro

"More than a sofa, we thought about a silent character who solemnly occupies corners (that tend to be spaces looking for a purpose) and affirms a strong stage presence while providing a precious contribution to the acoustic wellbeing of the community. When he finds himself with other elements of his family, they join to form islands, delimiting spaces, suggesting noble perspectives just like him: SNOWKING!"

(Annalisa Dominoni, Benedetto Quaquaro)

# **NAPWORK,** Acoustic Sofa Design Paola Navone - Otto Studio

"Hexagonal and linear modules with an informal image compose a modular system of acoustic upholstered seating, potentially never ending. Whether in its single version for small rooms or as multiple pieces for large common areas, from the small lounge to large environments, the system combines acoustic well-being and the pleasure of a comfortable seat."

(Paola Navone)

# **CILINDRO,** Acoustic Sofa Design Claudio Bellini

"A geometric structure, synthesis of an interlocking of volumes and essential shapes. Analytical intersections of points, lines and surfaces, inscribed in an acoustic seat of modernist inspiration"

(Claudio Bellini)

# **VOLUMI,** Acoustic Sofa Design Caimi Lab

Modular collection of sound-absorbing furniture distinguished by visually squared lines but with great softness to the touch. A band of anthracite-coloured fabric in the lower part creates a sill and an interesting chromatic play that accompanies all the elements.

The optimal use of the Snowsound Fiber sound-absorbing cover achieves interesting acoustic performances

(Caimi Lab)
