The panels really look great and have been very effective at mitigating our sound issue at Print...we get unsolicited compliments from guests about the Flap panels on a daily basis.

- Adam Block, Owner of Print Restaurant

Before we installed the Snowsound panels... my ears would be ringing by the end of the day-most times I would leave at the end of the day with a migraine headache! Now, none of us have any of these experiences-plus noise has not been brought up by any of our guests-which is huge for us!

- Eric Agnew, GM of Beardslee Public House

The investment we made by installing the Snovsound panels several months after we initially opened has made a very significant improvement in the environment itself, the overall quality of the dining experience our guests have enjoyed and noted in their numerous online reviews as well as the quality of the work environment for our staff.

- Douglas Kawasaki, John Howie Restaurants LTD/GM

We really liked the design and elegant look of the Snowsound Baffle and the Charcoal Gray color was the perfect match to the color palette. After installation, there was an instant change with the Snowsound panels.
