NAPWORK
ACOUSTIC SOFA

DESIGNER

Paola Navone - Otto Studio

"Hexagonal and linear modules with an informal image compose a modular system of acoustic upholstered seating, potentially never ending. Whether in its single version for small rooms or as multiple pieces for large common areas, from the small lounge to large environments, the system combines acoustic well-being and the pleasure of a comfortable seat."

(Paola Navone)

NAPWORK

NAPWORK

A modular system of upholstered sound-absorbing seats with a supporting structure made of wood and elastic straps sized to independently absorb low frequencies. The seats are covered with sound-absorbing polyurethane and polyester, combined with upholstery in sound-absorbing Snowsound Fiber fabric made of polyester fibers. This combination allows the seat to effectively absorb different frequencies in the best possible way. The outer upholstery cover is removable.

ACOUSTIC PERFORMANCE

PERFORMANCE
~66 sq.ft.
OF 100% SOUND
ABSORBING
MATERIAL AT 1000 HZ

NAPWORK
ACOUSTIC SOFA
PATENTED

The diagram illustrates the acoustic sofa's performance. It shows a cross-section of the sofa with sound waves being absorbed. The text indicates that the sofa has an acoustic performance equivalent to approximately 66 square feet of 100% sound-absorbing material at 1000 Hz. The brand name 'NAPWORK' and 'ACOUSTIC SOFA' are prominently displayed, along with the word 'PATENTED'.

A+E TECHNOLOGY | ELECTROMAGNETIC REDUCTION (Optional)

Metallized high-tech polymer fabric with pure silver for radio frequency reduction. Specifically designed to reduce the power of electromagnetic fields. However, it doesn't completely obstruct signals, allowing the use of smartphones and Wi-Fi networks. This radio frequency reducing fabric can be included inside sofas and other sound absorbing elements, combining sound absorption with reduction of electromagnetic fields. A new patented technology for the well-being of people.

Standard Standard	Frequenza MHz (Start-Stop) Frequency	Residual signal power
GSM / 850	825-895	0.85%
GSM / 900	870-960	3.34%
UMTS	1920-2170	0.56%
LTE	2510-2690	0.30%
WIFI	2400-2500	0.60%
5G	3400-3800	0.79%
WIFI	5100-5800	0.75%

ACOUSTIC PERFORMANCE AND NOISE REDUCTION RATING

Absorption Coefficient and NRC: See testing data document

ACOUSTIC PERFORMANCE AND NOISE REDUCTION RATING

Absorption Coefficient and NRC: See testing data document

PERFORMANCE

Flame Resistance:

Passes NFPA 701 // NFPA 260 // CAL. TB 117 // UL 723 Class A // ASTM E 84 Class A

Environment:

100% Recyclable and GREENGUARD GOLD Certified, LEED v4 Credits and Certification, Declare Label, LBC Red List Free

Colorfastness to Light:

Grade 7 - "Outstanding" (Passes AATCC 16 / ISO 105-B02:2014)

Propensity to Surface Fuzzing and Pilling:

Grade 5 - "no change" (Passes ISO 12945-2:2002)

PERFORMANCE

Flame Resistance:

Passes NFPA 701 // NFPA 260 // CAL. TB 117 // UL 723 Class A // ASTM E 84 Class A

Environment:

100% Recyclable and GREENGUARD GOLD Certified, LEED v4 Credits and Certification, Declare Label, LBC Red List Free

Colorfastness to Light:

Grade 6/7 - "Excellent" (Passes AATCC 16 / ISO 105-B02:2014)

Propensity to Surface Fuzzing and Pilling:

Grade 5 - "no change" (Passes ISO 12945-2:2002)

A+E TECHNOLOGY, ELECTROMAGNETIC REDUCTION (OPTIONAL)

The sofa is arranged to accommodate a layer of RF-reducing fabric inside if requested.

Inner cover consisting of a layer of radio frequency reducing fabric made of technopolymer metalized with pure silver capable of reducing radio frequencies without completely obstructing signals so that smartphones and Wi-Fi networks can continue to be used. The radio-frequency reducing fabric is inserted into the seats between the frame and the upholstery, making it possible to combine the functions of acoustic reverberation reduction and radio-frequency reduction. A new patented technology designed for people's well-being.
