

IN

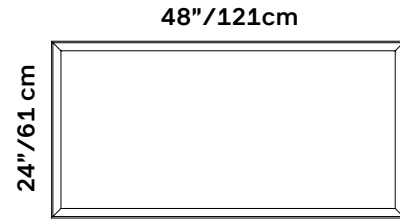

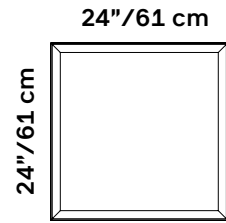

IN

IN patented Snowsound® panels seamlessly integrate into standard 2' x 2' or 2' x 4' drop ceiling grids, either as a highlight or blending naturally with the existing colors. They offer superior acoustic comfort compared to traditional Acoustic Ceiling Tiles (ACT). This system is adaptable for retrofitting into existing spaces or specifying architecturally during the design phase. IN panels are compatible with the following grid systems: 15/16ths T-bar, 9/16ths T-bar, 9/16ths bolt slot.
