shape your space

tune your vibe

Snowsound è la tecnologia che trasforma l'acustica in un'esperienza di design. Questo catalogo presenta la nostra collezione di soluzioni fonoassorbenti e tessili, pensate per migliorare il comfort acustico e allo stesso tempo definire il carattere di ogni ambiente.

Snowsound è molto più della semplice riduzione del rumore: scolpisce il suono, veste gli spazi e crea atmosfere che raccontano chi sei. Ogni materiale, ogni texture e ogni dettaglio sono progettati per offrire comfort, estetica e performance in perfetta armonia.

Snowsound is a technology that transforms acoustics into a design experience. This catalog presents our sound-absorbing and textile solutions, aimed at improving acoustic comfort as well as shaping the atmosphere of any space.

Much more than just noise reduction: Snowsound sculpts sound, dresses interiors and creates atmospheres that reflect the individual's personality. Every material, every texture, and every detail is designed to offer comfort, aesthetics, and performance in perfect harmony.

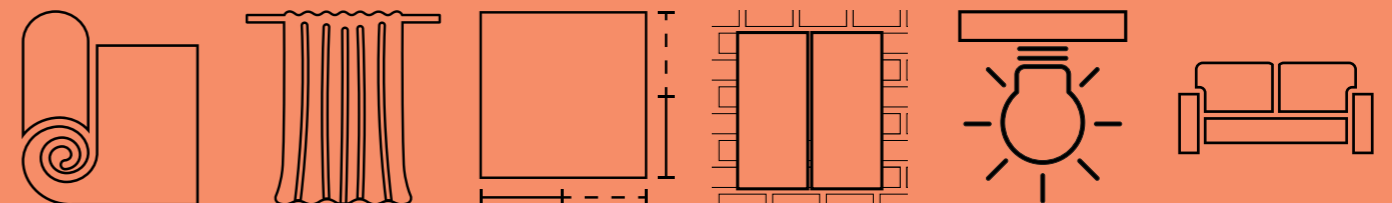

acoustic

blend

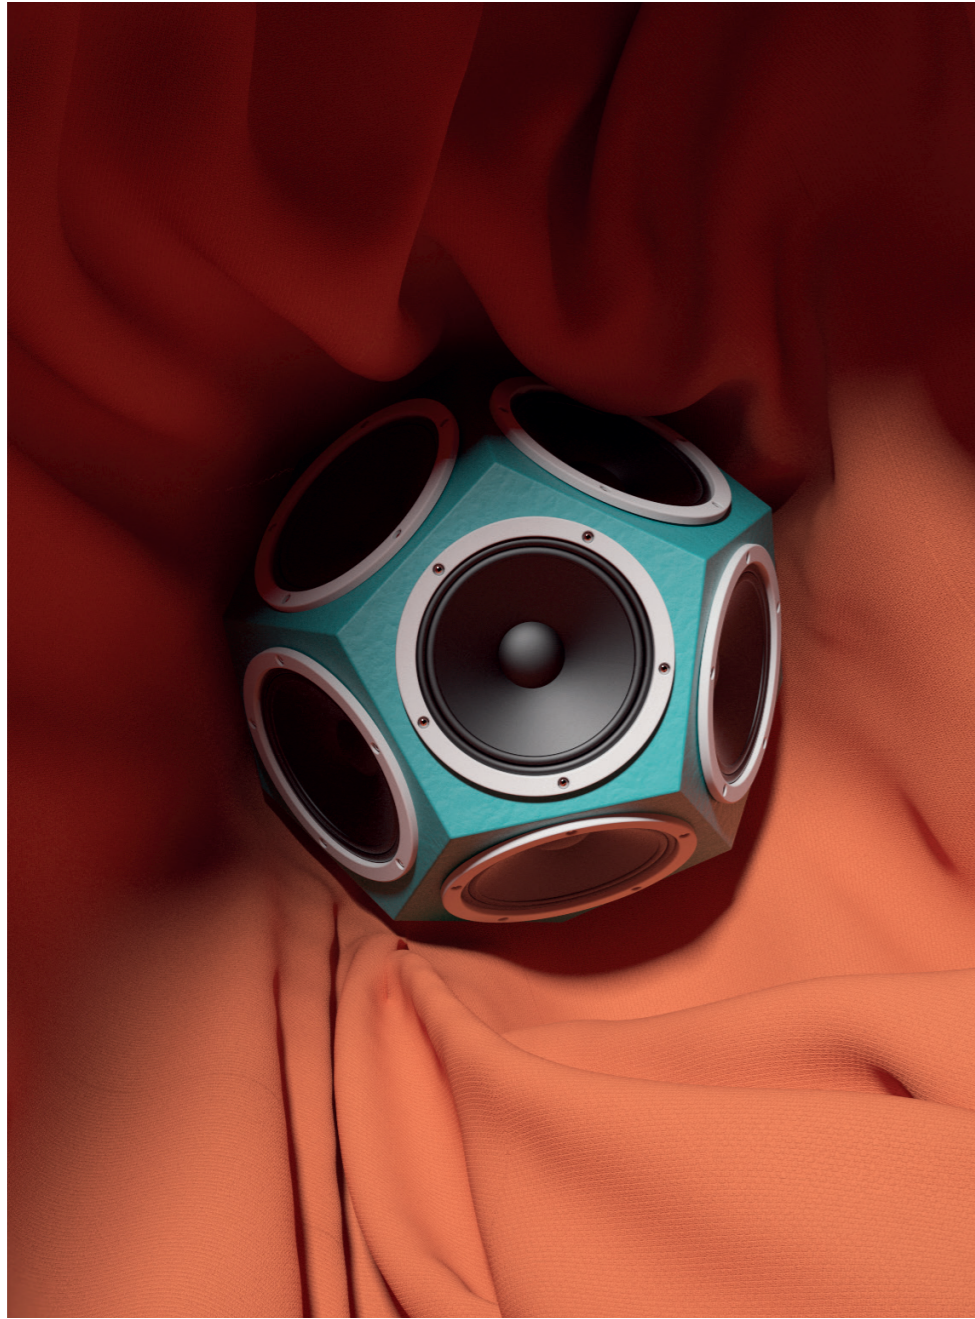

Il vero comfort acustico non nasce da una singola soluzione, ma da una sinfonia di elementi. La nostra filosofia progettuale persegue un approccio olistico che integra un vasto ecosistema di prodotti per modellare l'ambiente sonoro in modo impeccabile: tessuti, tende, pannelli, rivestimenti, imbottiti e lampade.

True acoustic comfort does not come from a single solution, but from a symphony of elements. Our design philosophy pursues a holistic approach that integrates a wide ecosystem of products to shape the sound environment flawlessly: fabrics, curtains, panels, coverings, upholstery and lamps.

tech
forward

Nei nostri tessuti, rivestimenti e soluzioni fonoassorbenti, l'estetica è solo la superficie. L'anima del prodotto, quella che fa la vera differenza, è l'innovazione studiata presso il nostro OpenLab - il cuore pulsante della nostra Ricerca e Sviluppo (R&S). È qui che ingegnerizziamo il comfort acustico, trasformando la scienza del suono in qualità della vita.

In our fabrics, coverings and sound-absorbing solutions, aesthetics is only the surface. The soul of the product, what really makes the difference, is the innovation developed at our OpenLab - the beating heart of our Research and Development (R&D) department. This is where we engineer acoustic comfort, transforming the science of sound into quality of life.

Rev Lab

sound control

Ogni materiale è concepito e testato non solo per arricchire l'ambiente con un'estetica curata, ma soprattutto per offrire una performance fonoassorbente misurabile e garantita. La funzione acustica non è un accessorio, ma il cuore del prodotto.

Each material is designed and tested not only to enrich the environment with refined aesthetics, but above all to offer measurable and guaranteed sound-absorbing performance. The acoustic function is not an accessory, but the heart of the product.

acoustic wellness

Non si tratta solo di "silenzio", ma di una gestione consapevole del suono per favorire una percezione acustica equilibrata e piacevole sfruttando materiali alto-performanti. Elemento fondamentale per la qualità della vita all'interno degli spazi architettonici.

It is not just a matter of 'silence', but of conscious sound management to promote balanced and pleasant acoustic perception using high-performance materials. This is a fundamental element for quality of life within architectural spaces.

eco design

Materiali riciclabili, durevoli e riconfigurabili:
pensati per ridurre gli sprechi e offrire alte
prestazioni con il minimo consumo di materie
prime.

*Recyclable, durable and reconfigurable
materials: designed to reduce waste and offer
high performance with minimal consumption
of raw materials.*

Dai toni neutri ai colori più audaci:
una tavolozza viva, pensata per accendere gli
spazi di emozione e personalità. Non devi più
scegliere tra estetica e funzione. Il tuo progetto
prende colore. Il rumore si spegne.

*From neutral tones to bolder colors:
a vibrant palette designed to bring emotion and
personality to spaces. You no longer have to
choose between aesthetics and function. Your
project comes to life. The noise fades away.*

architectural fit

L'eterogeneità e vastità della gamma Snowsound, unita alla creatività del progettista, garantiscono che l'intervento fonoassorbente non sia mai un elemento estraneo o imposto. L'acustica non deve essere percepita come un ripensamento, ma un elemento architettuale integrato che rafforza lo stile di interior design.

The diversity and breadth of the Snowsound range, combined with the designer's creativity, ensure that sound-absorbing measures never appear out of place or imposed. Acoustics should not be perceived as an afterthought, but as an integrated architectural element that reinforces the interior design style.

sound mapping

Con Snowsound, il comfort acustico non è un tentativo, ma una garanzia. Utilizzando dati scientifici, calcoliamo con precisione la massa fonoassorbente necessaria, affinché ogni prodotto - o mix di prodotti - contribuisca in modo preciso e misurabile al comfort acustico.

With Snowsound, acoustic comfort is not an attempt, but a guarantee. Using scientific data, we precisely calculate the sound-absorbing mass required so that each product – or mix of products – contributes in a precise and measurable way to acoustic comfort.

custom

made

Soluzioni su misura che riflettono l'identità di chi vive lo spazio. Tende, tessuti e rivestimenti murali vengono progettati con cura, partendo dalle esigenze del cliente e in armonia con l'architettura dell'ambiente. Non accontentarti dell'eccellenza, disegna!

Tailor-made solutions that reflect the identity of those who live in the space. Curtains, fabrics and wall coverings are carefully designed, starting from the customer's needs and in harmony with the architecture of the environment. Don't settle for excellence, design it!

designers are our eyes on the world

Le performance acustiche dei prodotti Snowsound prendono forma nei progetti di designers internazionali. Una moltitudine di forme e colori pensati sia per essere parte visibile e caratterizzante del progetto, sia per integrarsi con discrezione negli ambienti. Risolvere le problematiche acustiche, dalle più semplici alle più complesse, con una gamma integrata di prodotti basati su un approccio del tutto innovativo.

Snowsound acoustic performance takes shape in projects thanks to international designers. Many shapes and colours are designed to be a visible and distinctive part of the project and to discreetly integrate into the spaces. Resolving acoustic problems, from the simplest to the most complex, with a complete range of products based on a totally innovative approach.
