LUCREZIO

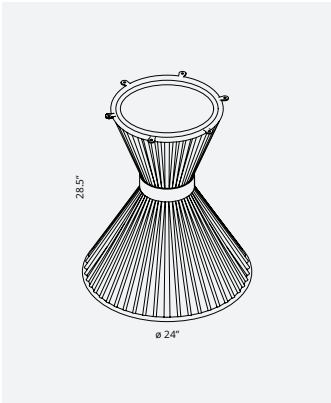

LUCREZIO

An innovative system of sound-absorbing tables, available in round and oval versions with tops of various sizes, designed to cater to diverse aesthetic and functional preferences. The structure, entirely crafted from epoxy powder-coated steel, features an original hourglass shape formed by narrow rods, resulting in two conical figures (upper and lower). Both conical figures are filled with sound-absorbing elements and covered with Snowsound acoustic fabric Fiber 3 Melange, offered in a wide array of colors.

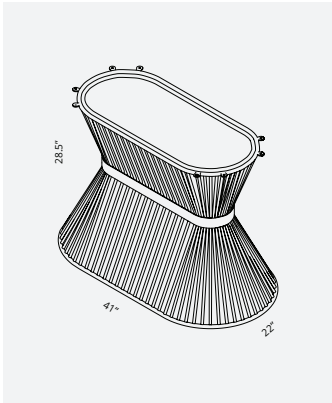

The composite material tops are constructed with a “sandwich” structure, comprising an MDF core sandwiched between two aluminum plates. The upper part and perimeter edges are coated with brushed cement (handmade). The artisanal craftsmanship of the tops ensures each piece is unique and exclusive in its finish and coloration.
